FOR GOLF SOCIETIES & CLUBS

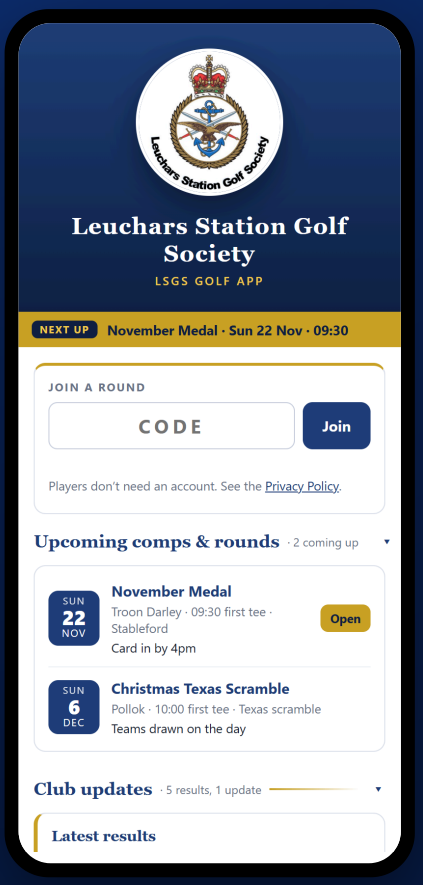

Your club's own golf app

Comps, live scores, leaderboards, member stats, challenges, news and the diary: all in one app with your crest, your colours and your name on it. Built for the committee to run in minutes, and for members to love opening.

Built from over 50 years of running military golf tours and competitions. Made for the forces, now free for every golf lover.

Live today with the **REME Old Gits Society** and **Leuchars Station Golf Society**

info@sksons.uk

WHY CLUBS SWITCH

No more spreadsheets, scraps of paper or WhatsApp maths

One link does it all. Players join a comp with a six-letter code, put their cards in on the course, and the leaderboard, handicaps, side comps and results work themselves out. The committee spends minutes, not evenings.

0
APPS TO DOWNLOAD
Opens in any phone browser. Add it to the home screen and it looks and runs like an app, with your crest as the icon.

72
PLAYERS PER COMP
From a Saturday medal to a full week away: up to 30 rounds a comp, every round on its own course and tees.

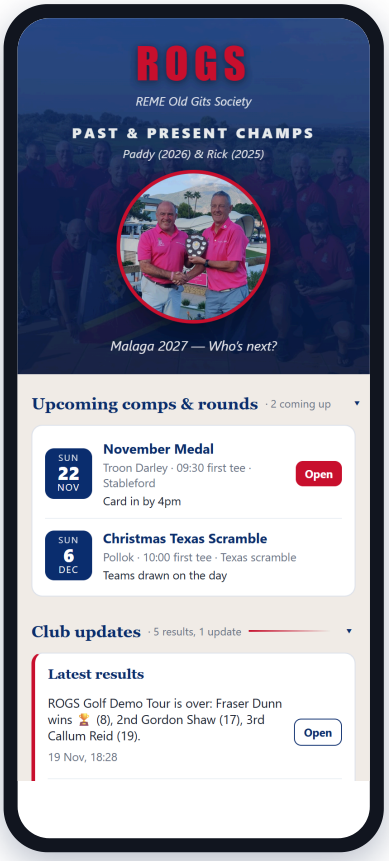

Free
FOR EVERY GOLF LOVER
Hosted on Google's free plan, sized for a club. No server for you to look after.

Three kinds of people, one app

WHO	WHAT THEY GET
Players	Join a comp with its code. No account, no password. Enter cards (live or after the round), follow every leaderboard, read the results.
Members	Their own login (they ask, the committee approves). My golf, a full stats profile, challenges with other members, the members-only areas.
Committee	Members the admin switches to committee. Run every club comp, the member list, access requests, password resets and WHS updates, from their own login.
Club admin	Front page, courses, sponsors, members, committee, and anything that needs taking down.

Where it comes from

This app is built on **over 50 years of experience running military golf tours and competitions**, from a Saturday medal to a full week away. That experience was sharpened by years involved with corporate events and the biggest tournament days in golf, like **The Open, the Ryder Cup and the Scottish Open**, and all of it has gone into the app. It was made for the military to use. But every golf lover deserves a proper app, so it's **free**.

The club's front page: what's on, latest results and news

What makes it different

- **It's yours.** Your crest, colours, name, champions photo and wording. Not a generic app with your club buried in a list.
- **The golf maths is done properly.** WHS course handicaps from each tee's rating and slope, playing handicaps, net and Stableford, countbacks and ties, checked by automated tests every time anything changes.

COMPS & SCORING

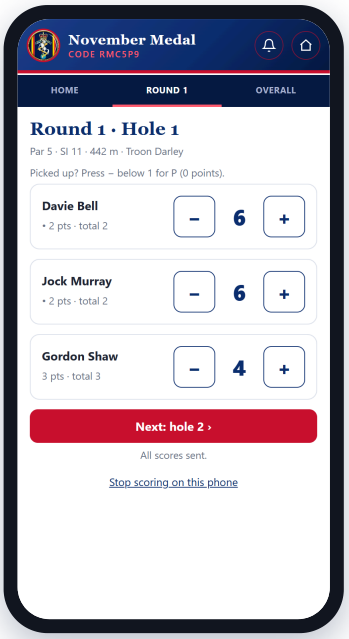

Every format your society plays

Set a comp up once (players, rounds, courses, tees, dates, rules) and share the code. The app takes it from there.

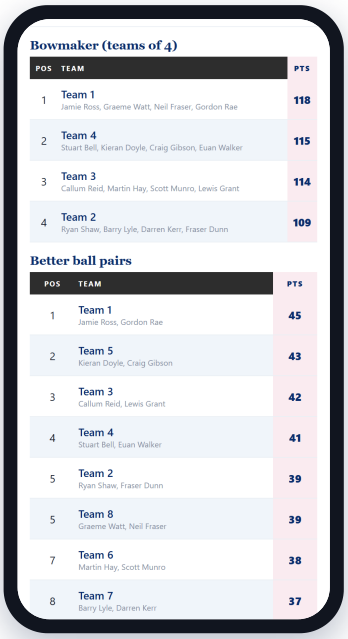

Formats, per round

STABLEFORD · STROKE PLAY (NET) · TEXAS SCRAMBLE · BOGEY · BOWMAKER · BETTER BALL PAIRS · MATCH PLAY: ODDS V EVENS · NEAREST THE PIN · NEAREST THE PIN IN 2 · LONGEST DRIVE

- **Live, hole by hole.** One phone per group keeps everyone's score as they play; the leaderboard moves as you go. Works with no signal and catches up when it's back.
- **Or a whole card after the round.** A player enters someone else's card (never their own), with the marker named. Pick-ups count as P in Stableford.
- **Cards lock when they're in.** Only the committee can correct one, or send it back to the player to fix.
- **Hide the scores till the end** if you like, then reveal the round with one tap.
- **Handicaps your way:** fixed, or moving round by round with your own cuts, add-backs and limits. The comp never touches anyone's WHS index.
- **Teams drawn for you** (balanced by handicap) for scrambles, Bowmaker and better ball, with WHS team allowances.
- **Results write themselves:** each finished round posts its podium, side-comp winners and twos, and "Tour over" crowns the winner with a trophy.
- **Players on different tees** in the same round, each with a fair WHS playing handicap.
- **Course library** with every rated tee (rating, slope, par, stroke index, metres or yards), including St Andrews, Troon, Pollok and the Costa del Sol and Algarve favourites. Missing one? Add it from the scorecard.
- **Download the results** as a print-ready PDF or a spreadsheet.

Live scoring for a group

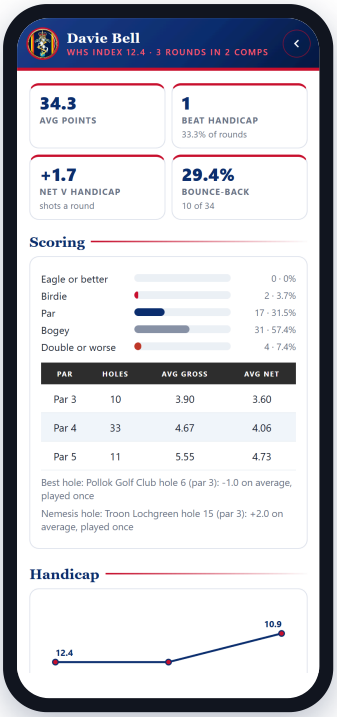

Side comps worked out from the cards

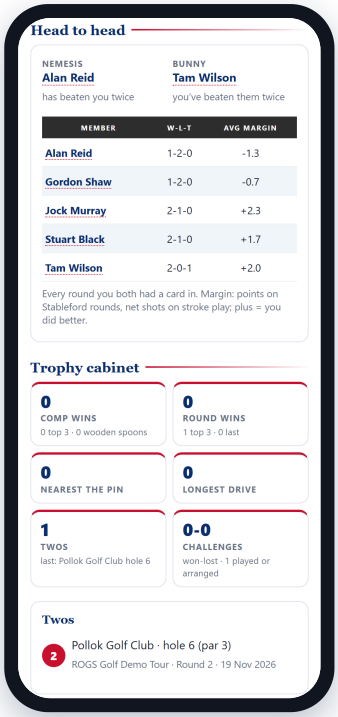

MEMBERS & STATS

Every member gets their own golf story

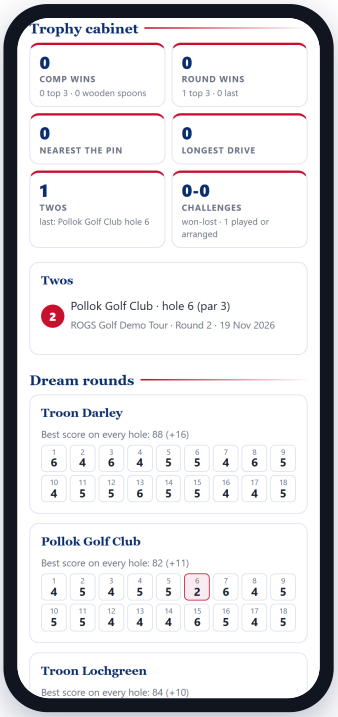

Each member's profile builds itself from every card they've ever put in. No typing, nothing to keep up to date. It's the bit members show each other in the bar.

Scoring and averages

Head to head, nemesis & bunny

Trophy cabinet and twos

On every profile

- **Scoring:** eagles to doubles, par 3/4/5 gross and net averages, bounce-backs, best and nemesis holes, front v back nine.
- **Handicap:** WHS index with its date and a trend chart round by round.
- **Head to head** against every other member: wins, losses, average margin, nemesis and bunny.
- **Trophy cabinet:** comp wins, round wins, podiums, wooden spoons, nearest the pins, longest drives, challenges and every **two**.
- **Dream round** per course and the full round history.

Challenges: the members' own side matches

- Challenge anyone from their profile: match play, Stableford or stroke play, 2 to 4 players, any course, any date.
- Played off everyone's WHS index; the result works itself out from the cards ("Davie Bell 3&2").
- A club **Challenges board** on the front page, and a won-lost record on each profile.

Members only

Profiles, the member list and the challenges board are for logged-in members and the committee. Comps stay open to anyone with the code, so guests can play.

THE CLUB'S FRONT PAGE

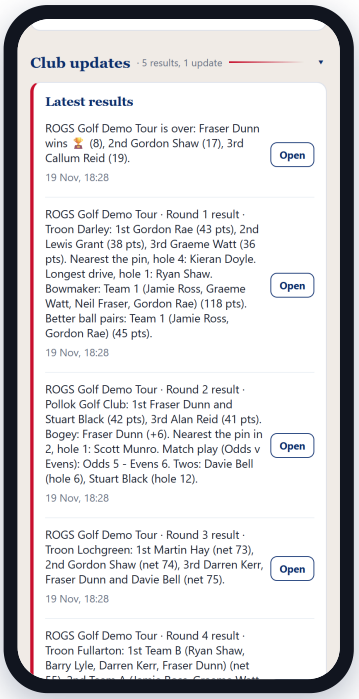

Everything that's happening, in one place

The first thing members see is their club: the crest, the champions, what's coming up and what's just happened.

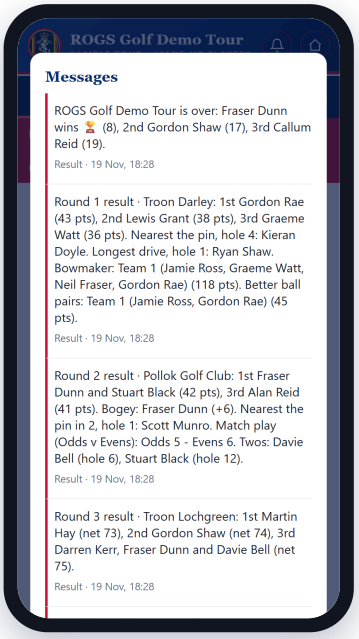

- **Upcoming comps & rounds:** the diary with date, first tee, course, format and notes, and an **Open** button straight into the comp. Past entries drop off by themselves.
- **Next up** strip for the next comp.
- **Latest results** appear on their own as rounds finish: podium, side comps, twos, and the overall winner.
- **Club updates** with headlines, text and photos, posted by the admin.
- **Challenges board** for members: what's arranged and the latest results.
- **Messages bell** in every comp: the organiser's notices plus automatic result posts.
- **Welcome back:** each phone remembers its rounds, so players are one tap from their comp.
- Sections fold away on a phone, and each phone remembers. A comp can carry its own logo.
- **Sponsors page** with logos, links and special offers that expire on their own date.

Made to look like your club

ROGS runs in REME navy and red with their champions photo and the Malaga countdown. LSGS runs in crest blue and gold. Same engine, two completely different clubs.

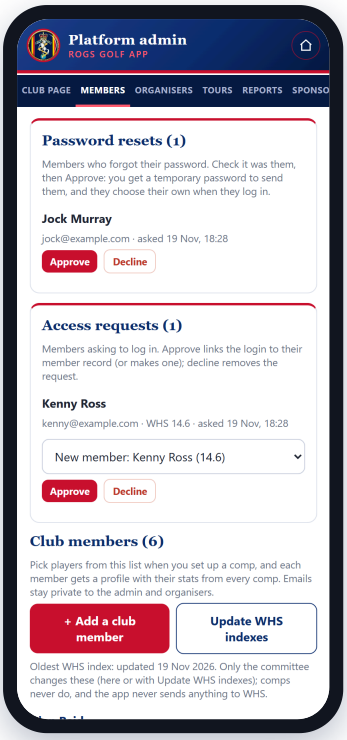

Results post themselves

The messages bell in a comp

FOR THE COMMITTEE

Run the club in minutes

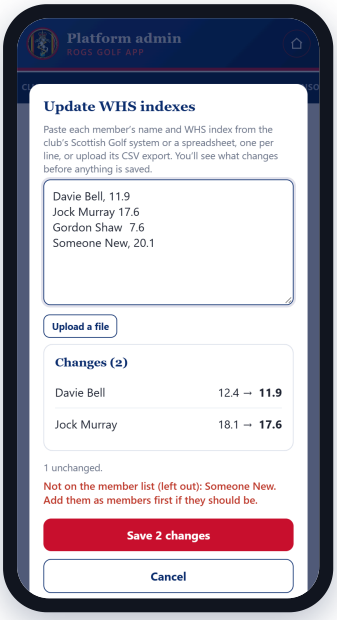

Requests and resets wait here

Members and logins

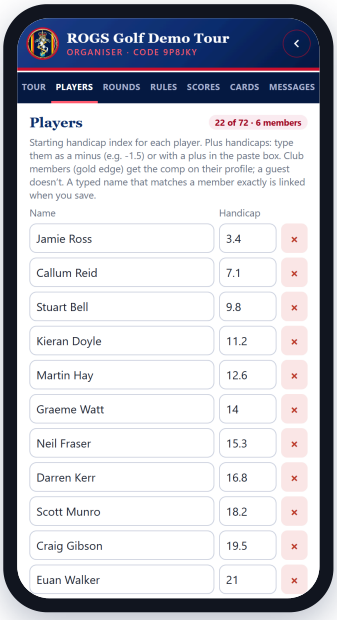

- **Ask for access:** members request a login from the front page; any committee member approves it and links it to their record. A gold **Waiting** button tells the committee there's something to do.
- **Or give them a login** with a starting password; they choose their own the first time.
- **Forgotten password?** The request goes to the committee, who approve it with a temporary password. No reset emails lost in junk.
- **Committee is a switch,** not a second login: the admin ticks it on a member's own account.
- **WHS indexes in one go:** paste the list or upload the club system's export, see exactly what changes, then save. The app never writes to WHS.

Comps

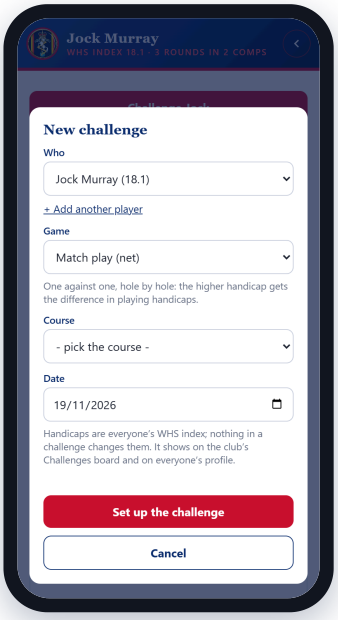

- Every committee member sees and runs **every club comp**; only the comp's owner can delete it or change its PIN.
- Players from the member list in a tap (guests welcome), handicaps refreshed from WHS, teams drawn, cards corrected or sent back.
- An optional **comp PIN**, a view-only look round for visitors, and a demo comp that new members join automatically, with sample scores so their stats show from day one.

Bulk WHS update, checked first

Members set up challenges

SAFE, PRIVATE, SIMPLE

Built properly, and yours to keep

Security & privacy

- Runs on Google Firebase; passwords are held by Google, never seen by anyone at the club.
- Every permission is enforced by the database itself, and tested against attempts to break it.
- Members' emails are private to the committee; profiles are members-only.
- Plain-English privacy policy and terms in your club's name (UK GDPR), linked from every page.
- Nothing is sent to WHS or anyone else.

What you get

- Your own web address, crest, colours, name and front-page photo.
- Set-up of your first admin, courses, members and committee.
- Courses you play added from the official scorecards.
- A home-screen icon for iPhone and Android.
- New features as they're built for every club.

How it starts

STEP	WHAT HAPPENS
1. A chat	Your formats, your rules, your courses, your look.
2. Your app	Built with your branding and set up with your courses and committee.
3. Try it	A demo comp for the committee to play with before anyone else sees it.
4. Launch	Send the members one WhatsApp message with the link: they ask for access and add it to their phones.

See it running

Free for every golf club and society. Ask us for the demo comp code and play with a live leaderboard, the stats and the organiser screens.

Sign your club up online, it takes about 10 minutes:

club-signup.steve-013.workers.dev

Scan to sign up

Screens show sample comps with made-up players. The Open, the Ryder Cup and the Scottish Open are named only to describe our experience; this app is not connected with or endorsed by them. Phone push alerts and App Store / Google Play versions are not included today; messages and results appear in the app.
